Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 5, drawn to a pivoted sideguard assembly for a bed, classified in class 5, subclass 430.
- I. Claims 6 to 9, drawn to a pivoted castor assembly with an actuator, classified in class 16, subclass 34.
- III. Claims 10 to 19, drawn to a bed assembly with a castor mounting assembly, classified in class 5, subclass 310.

The inventions are distinct, each from the other because:

Inventions of Groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention of Groups I, II, II, and IV has separate utility such as use by itself, or in combination with another type of bed. For example, the castor mounting assembly set forth in Group IV could be used with a any type of articulated bed, or could also be used upon other types of furniture such as a bedside cabinet. The sideguard assembly of Group II could be used upon a conventional flat bed or upon any type of articulated bed. The castor and actuator of Group III can clearly be used with a conventional flat bed, or any other type of articulated hospital bed. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for any one of the Groups is not required for the other restriction as indicated for examination purposes is proper.

Art Unit: 3673

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
